

SEED POTATOES

2025 Selections

BLACKBERRY - Double Certified Organic Seed * *Heirloom*

80-95 days (mid) [POBB]

This new variety has excellent eye appeal with dark purple skin and purple flesh. Sets up to 10 smooth shallow eye tubers that are attractive and uniform in shape. These anthocyanin-packed, round potatoes are tasty and retain their deep color when cooked. An excellent variety for gourmet potato chips. High producers and disease resistant.

BURBANK RUSSET - Double Certified Organic Seed * *Heirloom*

95+ days (mid) [POBR]

Russet skin, shallow eyes, and white flesh are characteristic of this long-oval russet. Great taste—baked, fried or boiled. Long-storing, scab-resistant potato needs a consistent moisture supply. Most widely grown potato in the U.S. originating from Luther Burbank's early plant breeding. This is the potato that made Idaho famous.

DARK RED NORLAND - Double Certified Organic Seed * *Heirloom*

70-90 days (mid) [PRN]

This potato has deep red -- almost burgundy skin (with shallow eyes) and white flesh. It makes good potato salad, keeps well, has good disease resistance and moderate scab resistance. This old favorite is high yielding. The red skin fades to pink in storage!

DESIREE - Double Certified Organic Seed

95-100 days (late) [POD]

Red skinned potato with deep golden flesh, moist creamy texture. Good disease resistance, very reliable and easy to grow. Great for all methods of cooking from roasting to mashed.

GERMAN BUTTERBALL - Double Certified Organic Seed

95+ days (mid) [POGB]

Order this extremely popular potato early! Its smooth, thick, golden, and netted skin and butter yellow flesh are characteristics of this small to medium oblong tuber with outstanding taste. Great for hash browns, fries, steaming or baking, and it stores well. Excellent flavor.

GREEN MOUNTAIN - Double Certified Organic Seed

90-120 days (late) [POGM]

Famous for its marvelous flavor and exceptional baking qualities. An heirloom released in 1885, bred in the Green Mountains of Vermont. Produces a high yield of light tan-skinned, white-fleshed tubers that store exceedingly well. Resistant to verticillium, blackleg, and fusarium storage rot, but susceptible to scab and viruses. Large spreading plant with big, white flowers.

HUCKLEBERRY GOLD - Double Certified Organic Seed

75-95 days (mid) [POHG]

Dark purple skinned potato with yellow flesh. Medium sized round to oval tubers with a very creamy buttery texture that makes excellent mashed potatoes. Good disease resistance. Great for all methods of cooking. Medium yields.

KENNEBEC - Double Certified Organic Seed * *Heirloom*

75-95 days (mid) [POK]

This short oval potato with smooth pale yellow skin, shallow eyes, and white flesh can be used for fries, hash browns and many other uses even without peeling. Kennebec, one of the best keepers, is resistant to blight and mosaic, late blight, and net necrosis. The heavy yields of dependably large potatoes on most soils makes this a great potato in the North. Plant sunburns easily.

MASQUERADE- Double Certified Organic Seed

85-100 days (mid-late) [POMQ]

Purple and violet skinned potato with gold-colored flesh. Produces a beautiful plant with purple colored flowers. Very high-yielding. Great for all methods of cooking from roasting to mashed.

PURPLE VIKING - Double Certified Organic Seed * *Heirloom*

70+ days (early) [POVP]

These beautiful potatoes have smooth dark purple skin with violet splashes and pure snow white flesh with brilliant neon pink splashes. They are great mashers with excellent flavor. These very early potatoes store well and are drought-resistant. This high-yielding potato was developed at North Dakota State University in 1962.

WILD PURPLE - Double Certified Organic Seed

85-100 days (mid-late) [POWP]

A new variety that produces two different colored potatoes on the same plant – both having dark purple skin, one with dark purple flesh and the other with yellow eyes and variegated flesh. Great taste and perfect for displays. Keeps well in storage.

YUKON GOLD - Double Certified Organic Seed

65-75 days (early) [POYG]

This round tuber has smooth, thin yellow skin with pink coloring around shallow eyes and yellow flesh. It provides excellent flavor when baked, boiled or made into salads or fries; too moist for hash browns. The best selling early variety is a moderate keeper, and is drought-tolerant.

FINGERLING POTATOES

AMA ROSA - Double Certified Organic Seed

90-110 days (late) [POAR]

With smooth bright red skin and deep red flesh throughout, these sweet, creamy and nutritious fingerlings are ideal for baking, roasting and grilling. They make intensely colorful potato chips as they retain their sweetness and uniform bright red color.

FRENCH FINGER - Double Certified Organic Seed

90-110 days (late) [POFF]

This fingerling is gourmet quality with smooth red skin and yellow flesh. There is usually a little pink/red ring just under the skin. It produces medium to large tubers. Excellent boiled, roasted or in soups.

LA RATTE - Double Certified Organic Seed

100-120 days (late) [POLR]

French fingerling potato, the culinary superstars of European haute cuisine. Mildly nutty, reminiscent of chestnuts, hazelnuts, and almonds with a subtle sweetness!

RUSSIAN BANANA – Double Certified Organic Seed

105-110 days (late) [PORB]

This fingerling, developed in the Baltic region of Northeastern Europe, is an excellent salad potato. The skin and flesh are both yellow – with firm texture. Heavy yields of medium-sized, all-purpose tubers. Excellent resistance to disease.
